PROFILE

I'm currently working in the Locations Department of a feature movie. I have experience in creating maps, movement orders, recce schedules, presentations and location agreements. I've worked on set, scouted filming locations, liaised with the local council and property owners, coordinated swings, crew movements and outsourced services (e.g. location security, real estate, transportation). I have previous experience in the military, travelled the world and have used photography as a storytelling tool - for this I was recognised by National Geographic and Nikon.
