Hi,
My name is Ben, I'm a Drone pilot and Videographer from the Gold Coast. I'm reaching out because I'm interested in the job offering you have.
Iv been working in film and television for around 9 years. Iv worked on many different TV shows, a lot of big and small Movies.
I started out as a Grip were I learnt a lot about the structure of creating content. I have my own drone business that specialises in content creation, working on some of the biggest TVC in Australia. I know my way around a camera very well, been shooting my own content for 3 or 4 years. I use final cut pro as my editing software. Personally I specialise in car content, with some of my instagram content getting over 200k views, but I have the ability to shoot anything. Im also a fully licensed FPV Pilot, which is a great way to create a lot of interest for social media platforms.
Iv include a link to my drone showreel and a short social media commercial I did below.
