

D'Aguilar Wildlife supplies Australian native animals, exotic species, insects, and fish for film and television productions across Australia. The team delivers trained animal handlers, compliant transport, and on set welfare supervision to meet production schedules and legal standards. Species range includes mammals, reptiles, birds, invertebrates, and aquatic life suited for close ups, live action scenes, and controlled studio environments. Productions receive guidance on permits, risk management, and biosecurity to ensure smooth approvals and efficient shoot days.

Through our experience D'Aguilar Wildlife works with producers, directors, and art departments to match species to scripts, prepare animals for camera work, and maintain high welfare outcomes throughout pre-production, filming, and post wrap logistics.
