PROFILE

My name is Finn Francey and I am an emerging editor, with an interest in both short and long form storytelling, and both horror and sci-fi genres. I graduated Griffith Film School in 2023, and I'm specialising in offline editing, with some experience with VFX and animation.

As an emerging Editor and Stop Motion Animator, I have created numerous short films that are shown on my own YouTube Channel - tinyurl.com/CrossFilms.

Appreciating that editing has a rhythm to it, my skills as an accomplished musician enhance my ability and understanding of film and narrative.
