# EQUIPMENT SUPPLY

Split Village is constantly researching and developing unique ways to push the capabilities of Video Assist in Australia. Lead by our Director and VTR Operator, Caeden Miller, our company designs, prototypes and manufactures different systems to suit the requirements of different on-set and production environments. We're always interested in discussing video topics and putting forth ideas to suit your video assist problems. Here is a recent case study:

**2025**

**Production:** *Dustbowl/Epilogue (ABC TV Series)*

**Director of Photography:** *Mark Wareham, ACS*

**Line Producer:** *Pam Collis*

**Director:** *Emma Freeman*

After months of prototyping and testing a lightweight system, Split Village approached production to open conversations regarding their preference for their Video Assist workflow. Working with Mark and Emma, we designed and manufactured a custom video assist solution based upon lightweight, accurate and powerful iPad systems capable of long-term playback, efficient storage organization, friendly interface and bright screens - all whilst keeping costs down.
